## ABOUT US

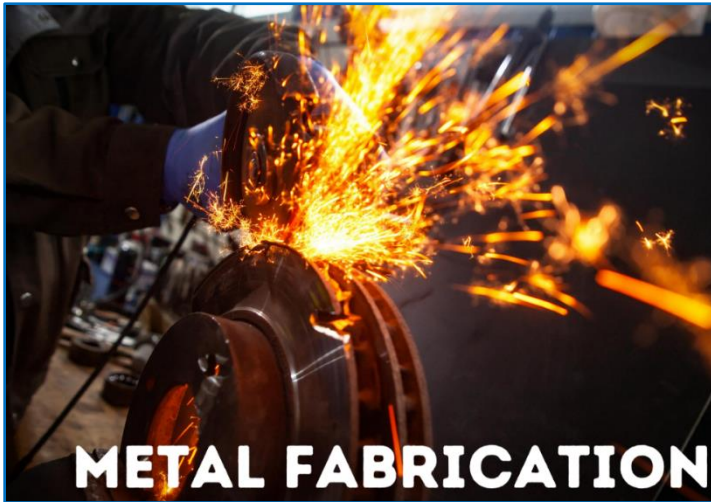

At Dickmann Manufacturing Co., we are manufacturers and suppliers of metal component parts. We're located in Grafton, Wisconsin with over 70,000 sq. ft of manufacturing space and more than 50 non-union employees. Since our founding years, over 60 years ago, our name has been synonymous with providing quality parts at a competitive price for customers across the Midwest.

We specialize in metal fabrication services primarily including metal stamping, metal forming/bending, laser cutting, turret punching, and welding. The company serves as a supplier for companies across a wide variety of industries and sectors including industrial furniture, lighting, consumer goods, agricultural, electronics, appliances, etc. We have the ability to take a project from rapid prototypes to production with a wide variety of material types.

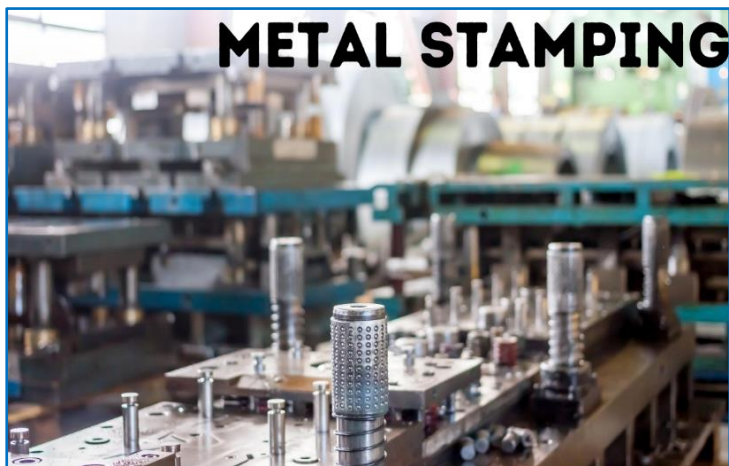

We pride ourselves on our precision, being nimble and agile, meeting customer demands and focusing on on-time delivery. Since our founding years we have remained a family owned company with a dedication to our customers, employees, and community alike.

## OUR SERVICES

Since 1957, DMC has been fabricating steel, aluminum, stainless steel, galvanized, and other popular metals.

DMC operates 14 punch presses ranging up to 300-ton capacities. These machines run coils up to 10 gauges with our progressive dies.

DMC has 4 turret press machines (3-22 ton, 1-30 ton), capable of punch diameters of up to 4.5", .020 to 3/16 thickness, and max table sizes of 50"x100" before repositioning.

## OUR SERVICES CONT.

DMC's 10 CNC controlled press brake machines have up to 5-axis and range up to 130-ton capacities.

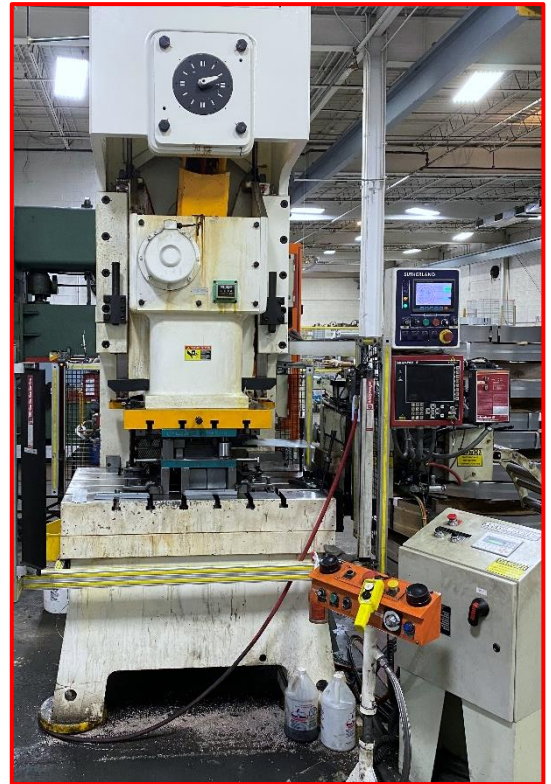

DMC's latest laser cutting technology has 9kW of power. We are cutting metals up to 1" in thickness mild steel and .5" aluminum and cutting tolerances as tight as .0002".

DMC offers high quality resistance, spot, stud, MIG and TIG welding services by experienced and certified welders in our new 3,500 sq. ft. weld shop.

## ADDITIONAL INFORMATION

### Additional Services and Capabilities:

- Assembly
- Delivery
- Embossing
- Engraving
- Etching
- Tapping
- Kitting
- Machining
- Riveting
- PEM Insertion
- Plating\*
- Powder Coating\*
- Painting Wet and Dry\*
- Heat Treating\*
- Anodize\*

\*Outsourced

### In-House Tool and Die Shop:

- Die sharpening and repair
- Two surface grinders
- Two engine lathes
- CNC mill
- Manual mill
- Two drill presses
- Band saw
- Hydraulic H-Frame press

### Our Quality Standards:

- ISO 9001 2015 Certified and Compliant
- Hexagon Romer CMM Absolute Arm
- PPAP's on Request
